Profile

I'm always eager to learn new things. Currently, I'm working as a Web Developer with over 1.5+ year of hands-on experience. I mainly focus on backend development using Laravel, and I also work on the frontend using JavaScript and Vue.js. I've contributed to several projects, building and maintaining responsive, user-friendly web applications. I have experience working with MySQL and MongoDB for database management, and I use Git for version control. I'm always looking to improve my skills and grow as a developer.

Skills

Technical languages

HTML, CSS, Javascript, PHP

Framework

Bootstrap, Tailwind CSS, Vue JS, Laravel

Database

Mysql, MongoDB

Professional Experience

03/2024 – present
Rajkot, India

Full Stack Developer

CM Websolution

Currently working as a Backend Developer, responsible for building and maintaining server-side logic using PHP and Laravel. I also handle database operations with MySQL, API integration with Postman, and collaborate on front-end tasks using HTML, CSS, JavaScript, Bootstrap, and jQuery.

Modasa, India

Bachelor of Engineering

Government Engineering College, Modasa

2020 – 2022
Fareni, India

Higher Secondary Education

Shree Swaminarayan Vidyapeeth Fareni

Projects

Agriculture Product Selling website [🔗](#)

Developed a simple website to showcase agricultural products and enable sales through WhatsApp. Customers can easily view products and contact sellers via WhatsApp to place orders. Built an admin panel to manage product slides, upload products and categories, and update site content efficiently.

Blogging Website [🔗](#)

Designed and developed a blogging website where users can write, publish, and manage blog posts. The site features a clean and user-friendly design, easy content creation, and organized categorization for better navigation. Built an admin panel to handle post management, categories, and site settings efficiently.

WebTejas [🔗](#)

Developed a web platform that enables users to instantly create personalized business websites through a guided setup process. The system allows users to register, select a theme and color palette, and input company details to automatically generate a live, responsive website.
