2. _____

Acknowledgement

We have taken effort in this project. However, it would not have been possible without the kind support and organizations. We would like to extend my sincere thanks to all of them.

We are highly indebted to *Mr. Devang Nahin* sir for his guidance and constant supervision as well as for providing necessary information regarding the project & also for his support in completing the project.

We would like to express our gratitude towards our parents & faculty members of Prime BCA College for their kind co-operation and encouragement which helped us in completion of this project.

Our thanks and appreciations also go to our college in developing our career and helping us with their abilities.

Vasoya arpita.

Patel janu.

Patel krupa.

1.INTRODUCTION:

This project is aimed for hosting a restaurant online. This website name is “yummy food”. Currently we are hosting a restaurant here named “root food”, through which the restaurant can put it’s menu online and the customers and the potential customers can register in it and place the order online from their home through this website. This website can prove very useful for HORECA(Hotel, Restaurant, Cafe) business as due to it, they can publish themselves in the online world and improve their client base. Potential clients can also visit and go through the website and can know about the restaurant.

There are totally 2 modules used in it :

- 1.) Admin
- 2.) user(customer)

2.TECHONOLGY USE

The following Web Technology are use in website is:

1. Front-end Technology:

For Designing:

a)HTML

b)CSS

c)BOOTSTRAP

2. Back-end Techonology:

a)PHP

b)MYSQL

3.OBJECTIVE:

The purpose of our Food Ordering website is to make itself beneficial for the customer and the business so that they can stay afloat while also serving customers their favorite dishes. With Food Aggregators increasing their commission every quarter, it is unsustainable for the restaurant to manage their restaurant while depending on food delivery orders from swiggy and zomato. The online ordering market is expanding and, especially the online food ordering segment is growing at a very rapid pace. Food Delivery is the preferred way for customers to enjoy food these days. This change has been roughly owed to the pandemic where customers prefer to order food online instead of dining out.

What is an online ordering system?

An online food ordering system or an online ordering platform is a place where customers can directly order from the restaurant instead of going through a third-party food delivery business. It is a web-based ordering system where customers using a mobile app can use the online user interface to order online.

Online ordering systems are where you can easily ask customers to order from without needing to pay any

huge commission to ordering apps that are popular in the market these days

*** How Online Ordering and Delivery is Beneficial**

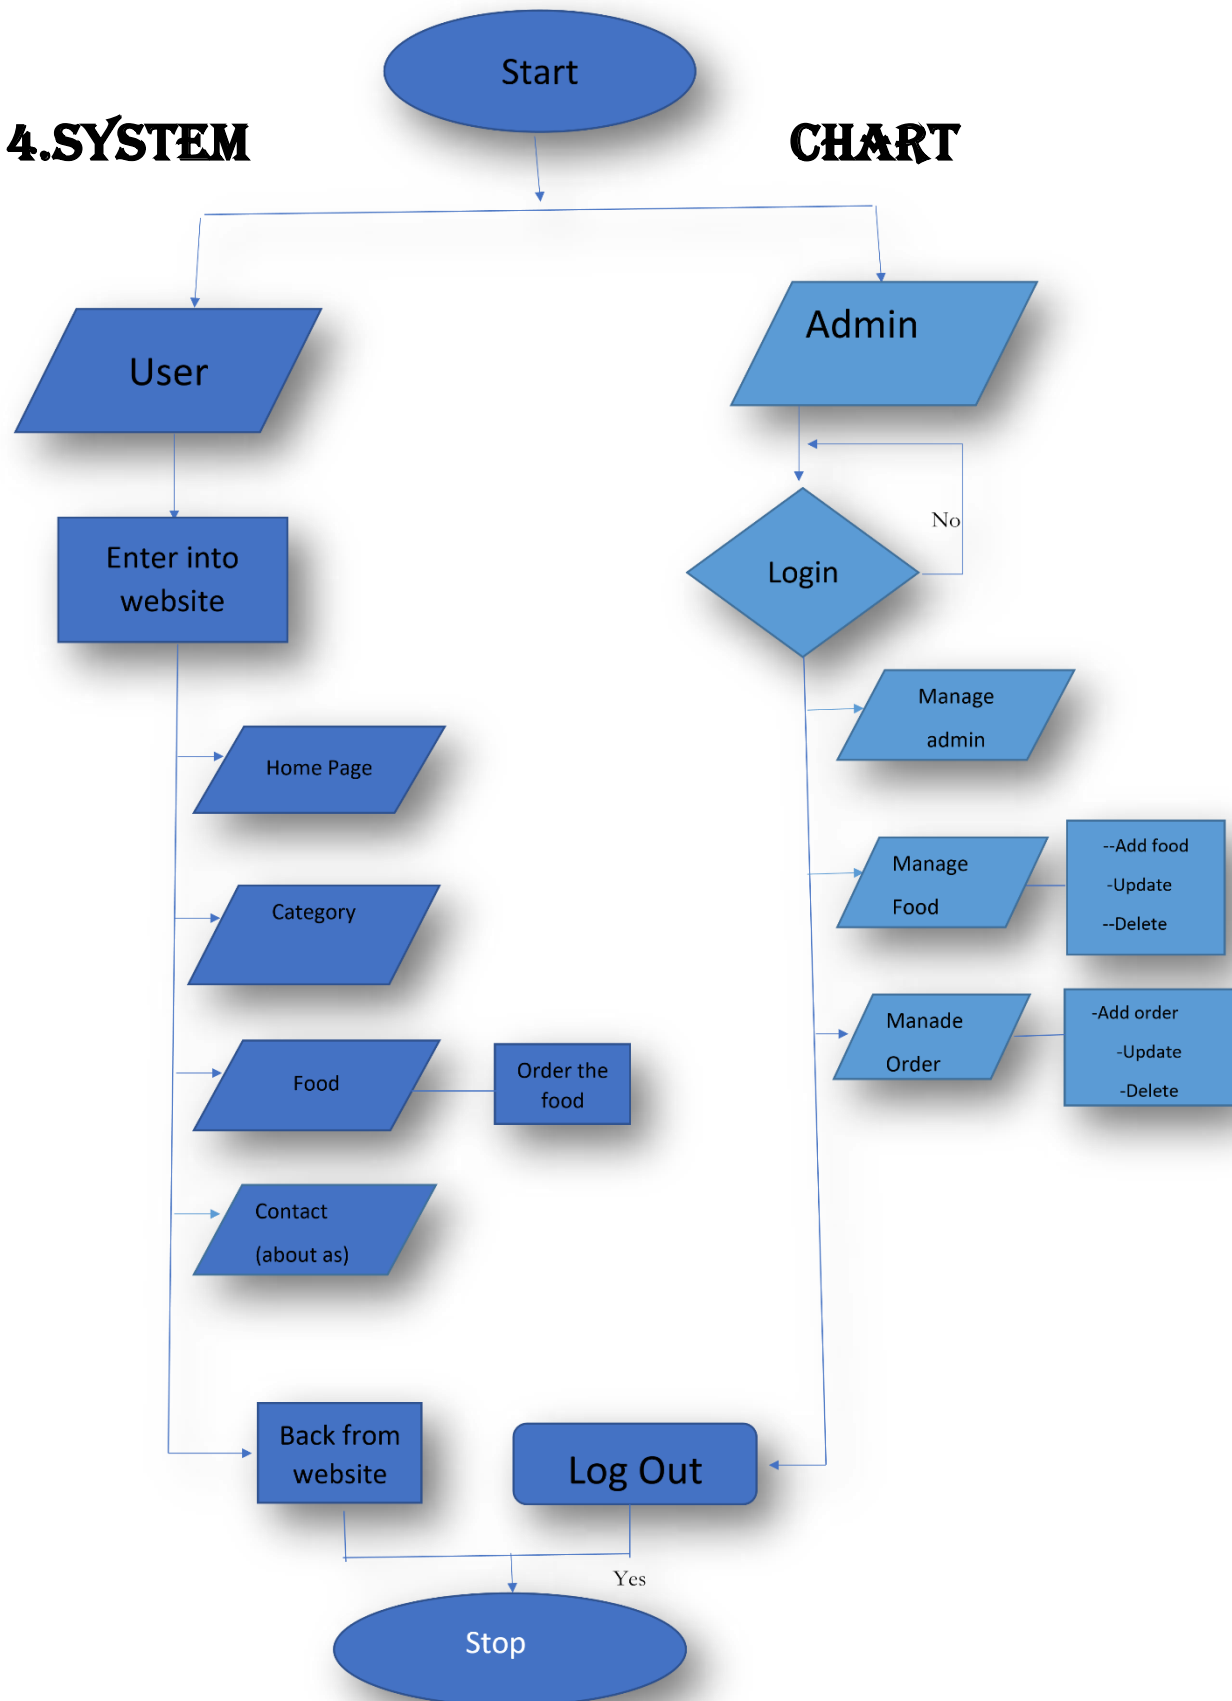

Food Ordering from the restaurant directly is beneficial for the fact that third-party aggregators charge a hefty commission from every successful order delivered. An Online food ordering website on the other hand doesn't charge those huge commissions and gives the business the customer data and what they order. There are a couple of advantages and disadvantages of online food ordering system.

Below are some of the main advantages:

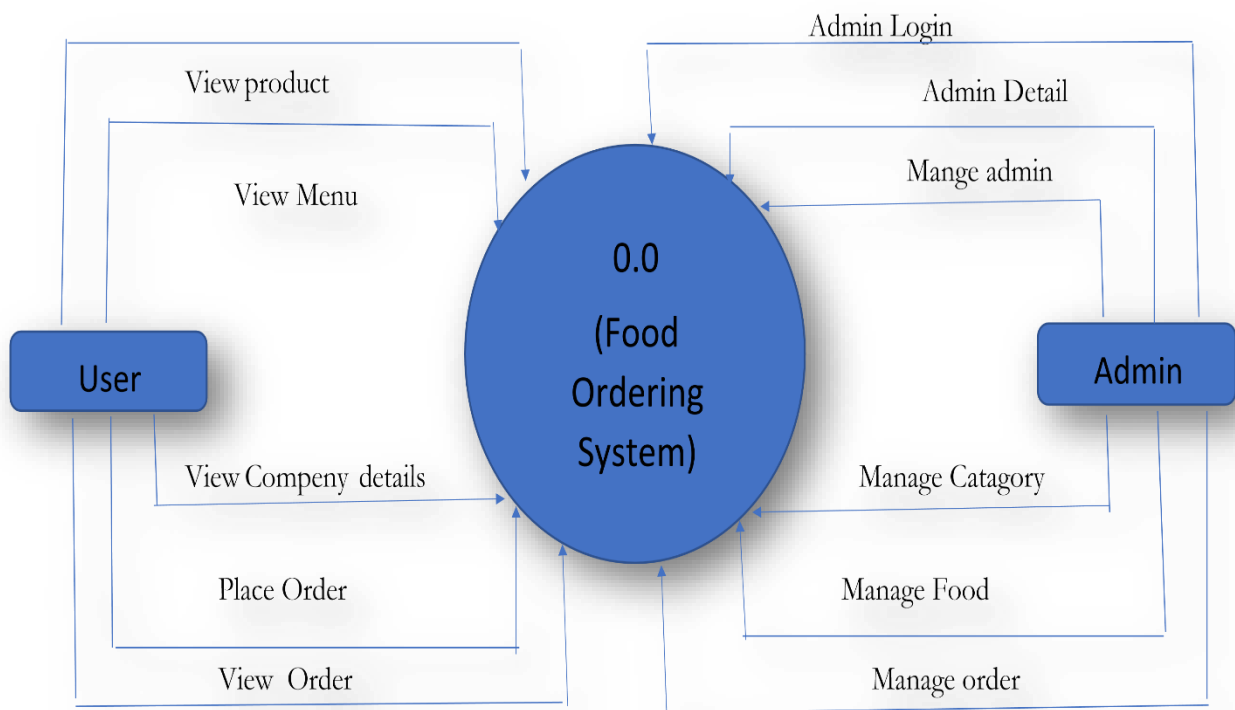

1. It Brings in Bigger Orders
2. Streamlined Operations
- . The Profit is All Yours
4. Easy to Customise
5. Roll Out Personalised Offers and Discounts
6. Better Customer Support
7. Gives You an Edge Over Competitors

7.SCREEN SHOTS:

- Admin side:

login page:

The screenshot shows a login page for a food ordering system. At the top, there is a large red rectangular header. Below this, the text "LOGIN FOR FOOD ORDERING SYSTEM" is centered. Underneath, there are two input fields: the first is labeled "Username" with a user icon, and the second is labeled "Password" with a lock icon. Below these fields is an orange "LOGIN" button. At the bottom of the login section, there is a link that says "Register Now!". Below the login section, there is another large red rectangular header.
